

COMPANY PROFILE

Contents

- introduction
- About us
- Our Mission
- Our Vision
- Our Values
- Our Commitment

In **Abr Al Sharq**, we believe in teamwork and unison, for that has always been a strength like no other, one where the weakness of one division will be filled and strengthened by the other.

Abr Al Sharq is an entity of three companies that act like three engines that drives it forward, each specializing on perfecting its quality in the field to strengthen and further raise the organization as a whole.

While time passes, challenges grow, demand increases, and new difficulties arise, however, the same has made our teams stronger, more experienced, dedicated, to the point where we take these challenges head on, and create a better result with our growing standards in quality.

While the fields might differ, the goals and approach have always been the same, to become the number one sought after service provider by focusing on the following points:

- To achieve and remain operating at the highest levels of quality and production.
- Minimal time consumption while delivering the highest level of work.
- Appropriate division and handling of funds. We would not be one of the highest ranking unless we knew how to efficiently handle finances, ensuring that we serve the client with most minimal cost, and treating their expenses as ours, while maintaining our level of quality.

About us

The three companies working as one have each their own departments that they are focused on:

Meeting with Kogas in Abr-Al Sharq Office

Presentation for Petronas in Dubai

• Abr Al Sharq

Base: Basra, Iraq

Establishment: 1998

Specialty: Rebuilding Iraq's infrastructure of the oil, gas, and power sector

Info: Acting as the corner stone of our group, Abr Al Sharq is devoted to the main cause that unites all the three companies together, which is the rebuilding of Iraq, and the contribution to providing a better life for its people. Heavily engaged in projects with the Iraqi government and foreign companies based in Iraq, we have been able to directly impact the quality of life for many parts of Iraq.

The services that are provided are as follows:

- Electrical power distribution projects, maintenance and supply of required spare parts.
- Base camp installations, commissioning and operational maintenance.
- Marine transportation, for General Cargo and heavy machinery.
- Tug boat chartering and Towing
- Design, construction, and maintenance of small oil-field installations (pump stations, gas turbines and diesel power unit)
- Design, and construction of buildings and civil construction.
- Supply of general civil engineering material and plant equipment.
- Supply of various chemicals such as but not limited to Aluminum Sulphate and Poly Acryl Amid to South Oil Company for use in oil well drilling.
- Onshore oil related projects.
- Supply and renting of heavy machinery and equipment.

Abr Al Sharq petroleum also specializes in providing business development solutions, such as:

- Marker Surveys.
- Providing project opportunities.
- Client/partner liaison relationship.
- Local Iraq employment schemes and personnel support services.
- Local procurement service with local suppliers.

- Local Financial services and banking.
- Company licensing, local government regulatory bodies.

• Abr Al Sharq

Base: Basra, Iraq

Establishment: 1998

Specialty: Oil and gas sector and the power industry, supply/procurement

Info: Blooming with over 150 employees, Abr Al Sharq has been working alongside the other companies. Licensed both in Iraq and the USA, this major limb of our establishment specializes in supply of heavy machinery, construction, and providing skilled manpower; and with it being an active company in the USA as well, our reach to the local market there has been enhanced and has impacted the growth of our assets and projects significantly.

The services that are provided are as follows:

- Lifting services and hoisting
- Shipping, logistics and Cargo clearing
- Chemical supply for Oil Well Drilling
- Oilfield material and equipment
- Mechanical and electrical engineering material supply, and spare parts
- Pipeline material supplies, repairs and testing
- Gas Turbine Maintenance and spares
- Diesel and gas related equipment and maintenance works
- Providing Skilled manpower

Our Mission

Every great achievement starts with a mission, and through the constant planning and patience, the goal grows closer, however, that is when we even raise the standards higher and aim for a better, more challenging quality of service.

We aim to become the first sought after establishment, when it comes to all Oil & Gas sector and subsectors related solutions, we aim to do this through focusing on the following points:

- Create a tightly knit network between our three companies, to provide all required services to our clients when any of the three are contracted.
- Set our Health, Safety and Environment standards not only to the highest grade, but even improve it further and become a beacon to those that want to follow suite.
- Give and provide to the community twice as much as we receive, but creating job opportunities and improving the quality of life, for we are nothing without the wellbeing and support of our own people/staff.
- Provide in house training and development for our staff to further improve their skills in the professional field.

Meeting with Greatwall - Garrif Oil Feild

Our Vision:

Our vision is our compass that is always pointing us towards our goals, and through it, we aspire to be:

- A place where people would love to work in, and with that fact itself, they push themselves to become the best they can be.
- A vast network of clients and partners; it requires teamwork and trust to build a winning empire.
- Always ahead of everybody else, whether it is our health and safety standards or our productivity and flexibility.

Presentation for Petronas Top Management in Garrif Oil Feild

Our Values:

Our Values will be always what defines us, how we define ourselves, and how others see us, which is why we strive to maintain the highest and most noble set of values.

- **Workplace:** Provide a friendly and healthy environment for our staff, through which they can constantly and comfortably improve themselves.
- **Management:** We believe in leaders and not bosses, a leader will pick up the load with the rest of team and work with them hand in hand.
- **Responsibility:** Treat our client's best interest as ours, which will insure a top of the line services, while keep finances and expenses in check for best efficiency.
- **Accuracy:** Know what we are capable of, while knowing exactly what the client requires, with these two factors combined, the best result can be tailored to satisfaction.

Our Commitment

We are committed to providing value to our clients and individual customers who rely on us for leadership, guidance and support. We are knowledgeable and passionate about what makes each of our company unique and powerful, and we are committed to finding innovative ways to fuel our clients and their growth.

Integrity

We display integrity at all times in the business decisions we make and the manner in which we conduct our professional relationships. We support that sense of doing what's right through a culture of open communications and a spirit of teamwork. We also value the role that diversity among our employees, suppliers and partners plays in our success.

Meeting with Kogas - Abr-Al Sharq Office

Responsibility

We take seriously our responsibilities as a leading company in the field, always aware of how our actions can benefit the community and sensitive to the needs of our clients. We make decisions at all times understanding our responsibility for enhancing profitability and serving the interests of our business partners. As a service company whose success is rooted in the satisfaction and performance of our people, we take responsibility for furthering the professional development of our employees at every level of the organization.

Samsung project

Samsung project

On 22 May we had delivered one of our cargos to Al ZUBAIR / JOB SITE relate to Samsung project ,

- cargo contains have around 99 PKGS ,
- contains special equipment's inside ,
- we used different types of trucks to load this heavy equipment's like " Flats & Extendable Low beds
- cargo delivered to the site on 3 lots
- each lot had a special crew /security company drove with them from UQM port till JOB SITE .
- photos is FYKI

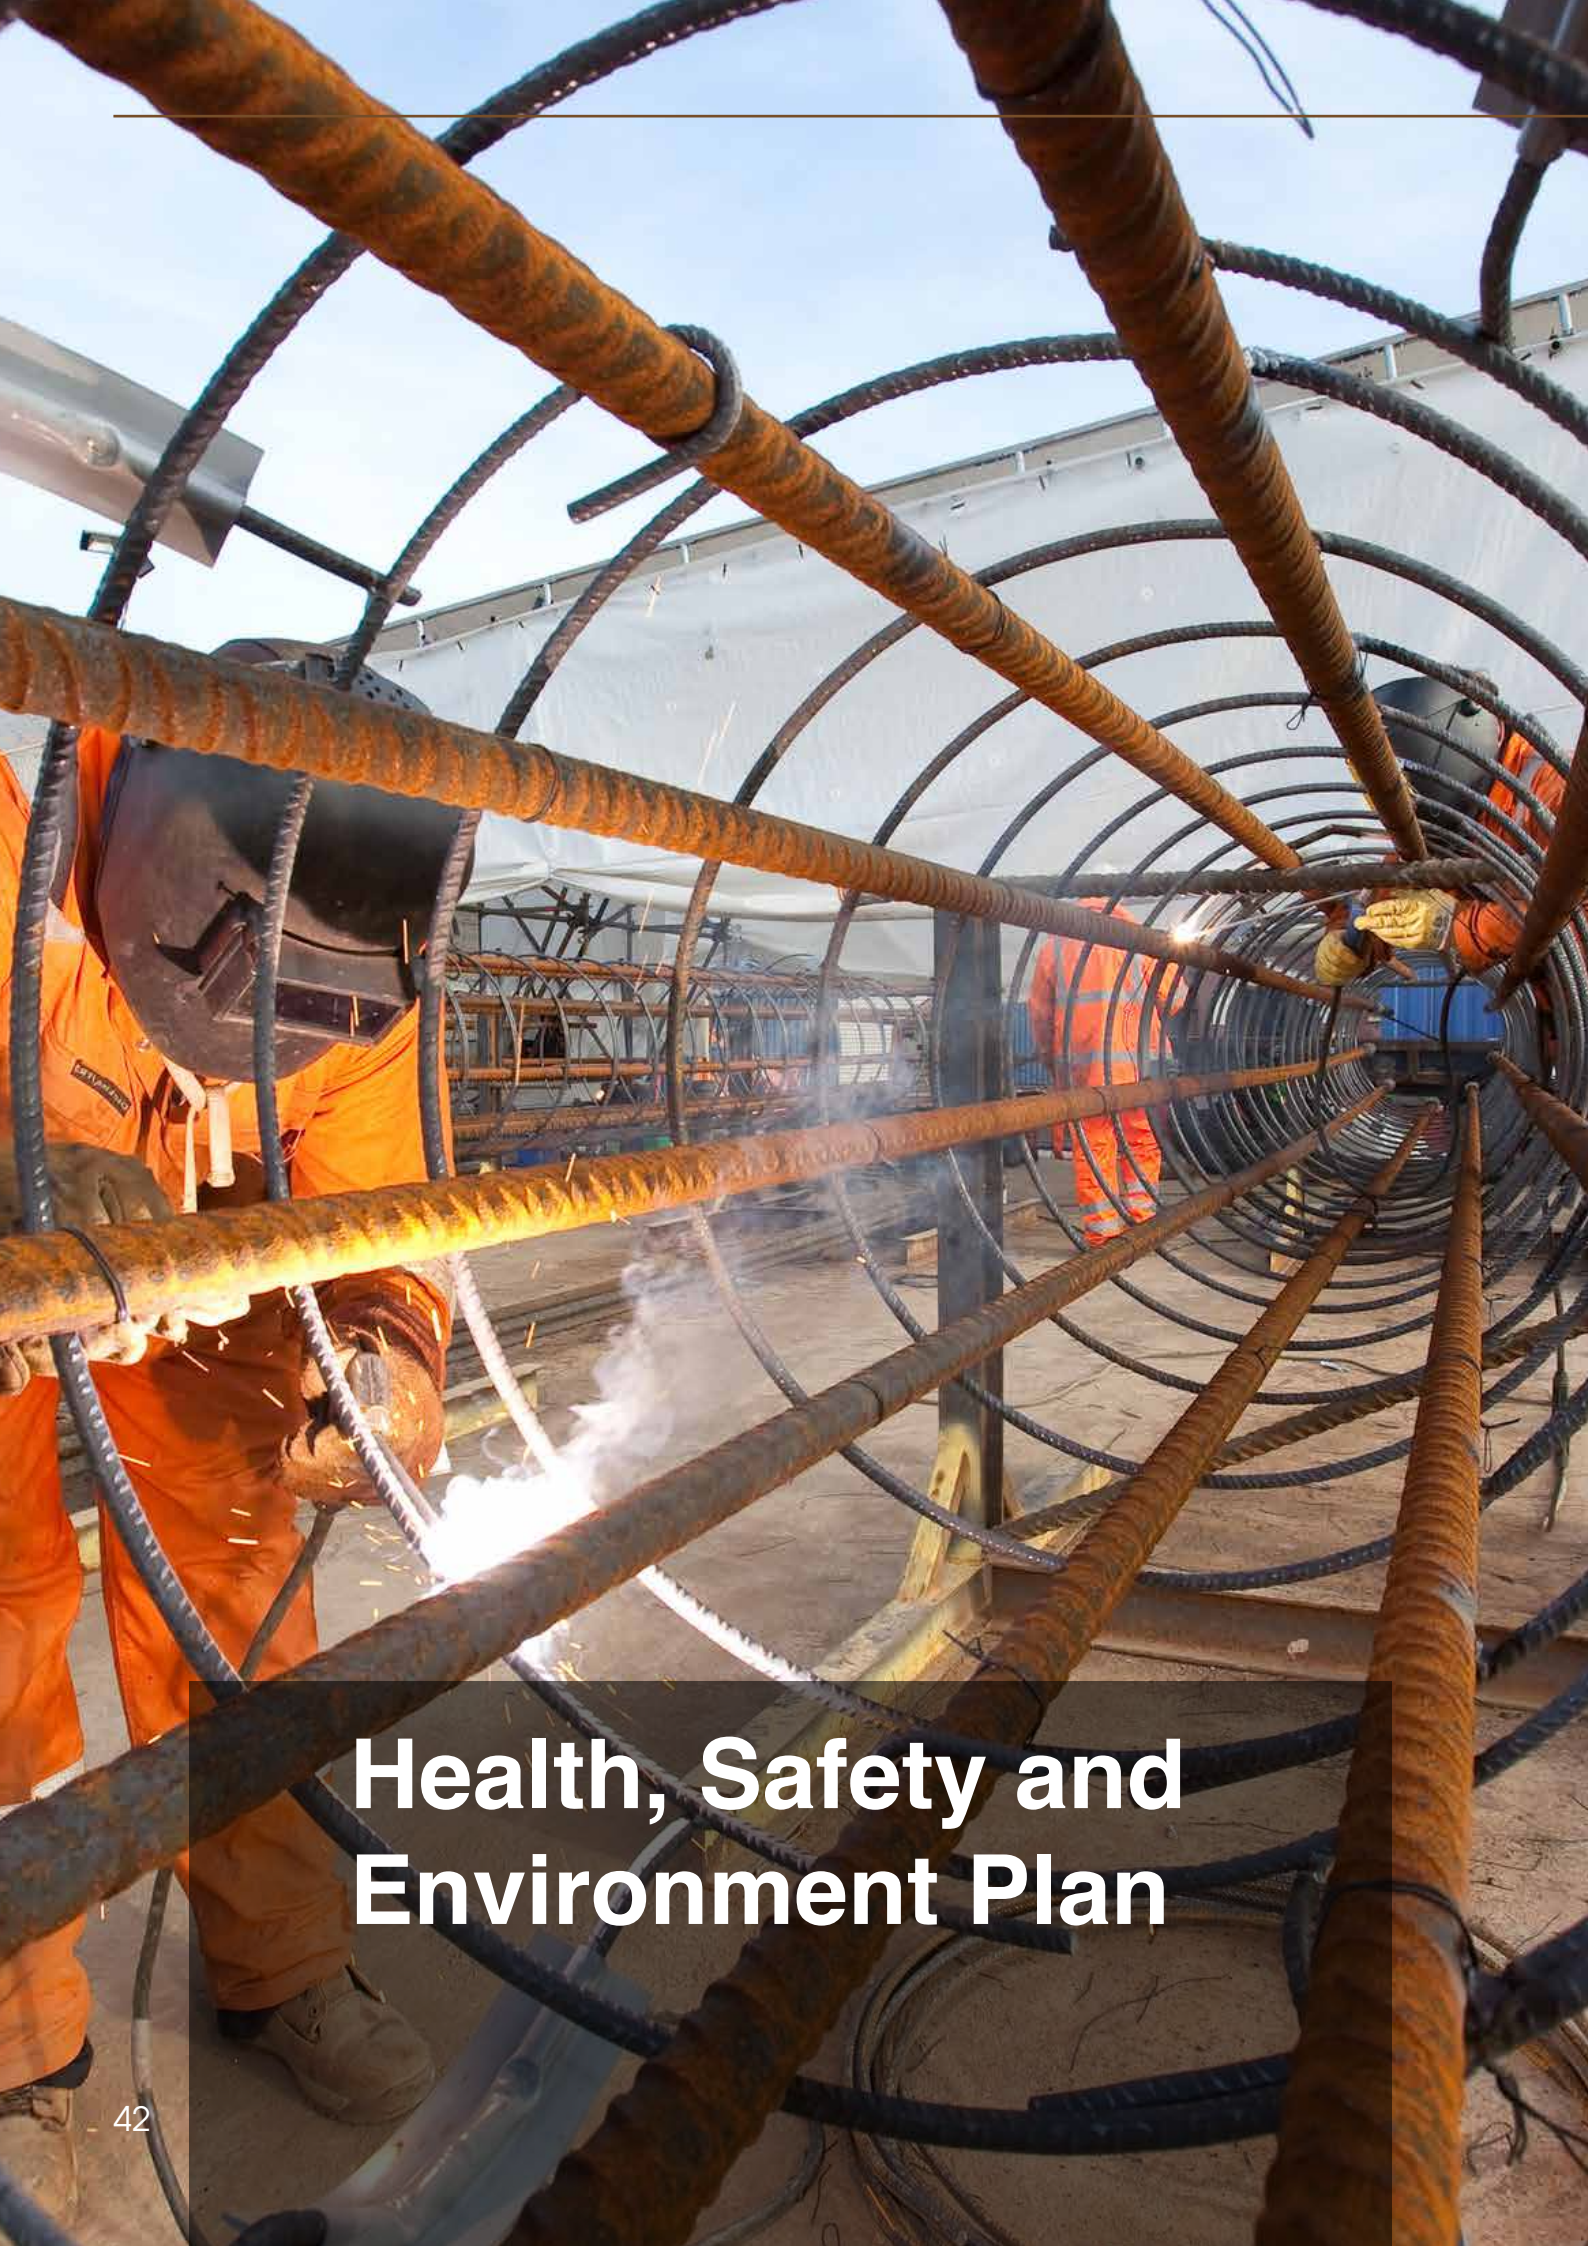

Health, Safety and Environment Plan

1. Policy, Leadership and commitment

- 1.1 Company policies and project commitment statement must be communicated and relayed to employees.
- 1.2 Organize monthly safety management committee meeting for revising and reviewing of HSSE performance
- 1.3 Participation in managers site walkabout/inspections involving company, company representatives and construction contractors senior staff
- 1.4 Site managers and senior staff to regularly attend Toolbox Talks.
- 1.5 Hold weekly Company on site meetings, to observe the ongoing standard with the responsible HSE staff
- 1.6 All construction meetings to begin with discussing safety issues and discuss recent incidents.
- 1.7 Project, construction, and site HSSE managers to review HSE progress .
- 1.8 Project manager to participate in Site HSE tour at least twice per annum.

2. Hazard and risk management

- 2.1 Perform, design HSE studies and workshops as per the HSE design philosophy.
- 2.2 Perform SIMOPS workshop & Haz Con/HSSE works for Green field and brown field prior to commencement of construction works as per Project HSSE plan.
- 2.3 Risk assessment/job safety analysis developed for operational controls, routines routes, and non-routine worksite hazards by construction contractors for their scope of work and approved by CR
- 2.4 Regular review of COSHH Assessments for all hazardous materials in accordance with project dynamics. Maintaining a comprehensive MSDS database at the HSSE office, and medical department.
- 2.5 Perform health risk assessment for the project, to identify the health impacts and possible control measures.

2.6 Establish and update Hazard and effects register and aspects/impacts register.

3. Planning, Objectives, Targets and Legal requirements

- 3.1 Key Performance Indicators Established for the project and Review of HSSE Key Performance Indicators (KPI's) against planning for progress and compliance
- 3.2 Legal requirements for the project reviewed, and Legal Register for the project established and reviewed every 6 months.
- 3.3 Annual Activities Plan Developed and Reviewed Quarterly

4. Organization, Roles, Responsibilities, Resources

- 4.1 Develop a HSSE organization chart with names and terms of reference for various functions Including the Construction contractor.
- 4.2 Review if HSE resources are in line with project schedules and demands to maintain effective HSE-MS
- 4.3 Have Job Descriptions developed for various HSSE functions

5. Training & Competency

- 5.1 Project HSSE Inductions developed and delivered to all new personnel including Construction Contractors
- 5.2 Identify Project Training requirements according to the project activities and develop / Update training matrix including Construction Contractors training requirements.
- 5.3 Conduct trainings. Review Training Matrix. Implement Training Program in accordance with Training Matrix
- 5.4 Develop training modules in required languages (Arabic, English) dependent on the different nationalities working on the project
- 5.5 Training Passports to be issued to the all project personnel to monitor the individual training needs.
- 5.6 Perform HSSE Competency Workshop for all safety related positions. Staff to complete the competency mapping Self-assessment and Supervisor Assessment to development activities.

6. Documentation, Implementation and Operational Approach

- 6.1 Develop Project HSSE Plan and Sub plans such as Security Management Plan, EMP, and ERP. Ensure Construction HSE Plans and procedures developed by Construction Contractors for their scope of work and are reviewed and approved by CR and COMPANY. HSSE field Manual which includes compilation project lower tier plans, Forms, Procedures and risk assessments etc.
- 6.2 Develop and implement safe system of work for the critical activities. Ensure that procedures are developed to address all identified risk exposures for planned works and future developments. Implement COMPANY PTW for brown field works.
- 6.3 Competent supervision: Target Contractor and Construction Contractors supervisors. Accountability for unsafe actions/unsafe conditions. Institute 3-step approach (coach, counsel, consequence management)
- 6.4 Develop and implement Safety Incentive and Disciplinary Action procedure.

7. Behavior, Communication and Consultation

- 7.1 Organise HSSE Meetings as per schedule according to the Project HSSE Plan
- 7.2 Ensure there is an effective system in place for the timely transfer of HSE information and feedback across all levels in the company and contractors. All employees must be aware of key HSE information and expectations (Tool box talks, Craft Meetings, Hand Book, Notice boards TSTI, STOP Etc...)
- 7.3 Develop and issue HSSE Hand books, Golden Rules of Safety and Company Life saver rules in required languages.
- 7.4 Implement STOP system /CR SAO on project for receiving feedback from all the employees on the project
- 7.5 Implement Total Safety Task Instruction (TSTI) System

8. Crisis and Incident Management

- 8.1 Develop Integrated Emergency Response Plan (ERP), Medical Emergency Response and Incident Reporting procedures for the project
- 8.2 Develop a schedule and perform Emergency Response, Medical Emergency Drills
- 8.3 Improve Incident Reporting Procedure throughout the field. Conduct regular meetings with Construction Contractors, HSE staff & Supervisors on Incident Reporting, including Near Miss incidents. Maintain effective processes management.

9. Compliance Assurance and Corrective Action

- 9.1 Develop Compliance assurance schedule for the projects (Audits and Inspection Schedule)
- 9.2 Perform Audits and inspections as per the Compliance Assurance schedule
- 9.3 Establish and maintain Action Tracking Register .Implement agreed actions/recommendations out of HSE Audits and inspections. Ensure Actions closed out within 21 days.
- 9.4 Verify that Construction Contractors has developed and is implementing a HSSE Site Inspection Programme
- 9.5 Support HSE Audits and provide adequate personnel for the task.

10. Performance Measurement, Review and Improvement

- 10.1 CR Management conduct HSSE Performance Workshop which includes Company and Construction Contractors to review the HSSE performance, to enable a HSSE Improvement Plan to be established for the following year
- 10.2 Corporate HSSE Director shall each month review/report the Project HSSE performance for the CR Executive Management Monthly Report.
- 10.3 Review /evaluate previous year's performance as input and valuable data for the next year's HSE Plan
- 10.4 Review of audit and incident action items. Recommend resources as required to maintain effective and efficient HSE-MS

Quality Policy

We in Abr Al Sharq Company for Petroleum Services LLC consider the quality is an essential component of our management policy. We are committed to provide various Inspection services efficiently and safely in accordance with the recruitment of our customers in constant manner.

We are dedicated to comply with and continually improve the effectiveness of the Quality Management System as per ISO 9001:2008 requirements. This will be achieved by employing effective project management skills for execution of projects as per customer requirements.

Conform to the quality systems as required by our customers and to achieve this goal; we shall closely coordinate with both our suppliers and customers.

We are seeking to promote the culture of quality within our company and maintain a quality system which involves the full and effective participation of our employees, by training, encouraging innovation, team-work and constructive feedback.

General Manager

Security Plan

1. Introduction

This Security Plan is designed around the pillars of accurate risk assessment, appropriate physical measures, comprehensive policies and procedures, and positive relations with the local community, as communicated by Company. Abr Al Sharq will not be employing expatriate personnel for this project and will not require the services of an armed security provider.

Abr Al Sharq will be supported by unarmed watchmen for the provision of static site security and intend to communicate directly with COMPANY security manager for any requests for assistance. All security related incidents will be reported to the Company security management team within required timelines.

Abr Al Sharq will not be operating at night and will not accommodate any staff within the field. Abr Al Sharq will commute daily to the work place in line with Company JM requirements.

2. Purpose

The purpose of this plan is to outline the security measures required during logistic works on Oil Concession and at Well Pad R. Abr Al Sharq is committed to providing a safe working environment for our employees, subcontractors and clients.

The prime function of the Abr Al Sharq Security plan is to protect staff, employees, and visitors against all forms of personal injury or damage to themselves or property from a security related incident. In addition, asset protection is also considered.

3. Scope

This Security Plan provides an outline of how Abr Al Sharq proposes to protect both assets and Personnel for the duration of the project life cycle. The following points will be outlined in this plan:

- A. Movement of Local National (LN) staff to worksite.
- B. Provision of general security at the Abr Al Sharq Office site at Well Pad R.

This Security Plan should be read in conjunction with Abr Al Sharq HSE Plan and other RtS pre-mobilization documents.

This security plan describes the security roles and responsibilities for all areas and personnel under Abr Al Sharq Security control including contractor personnel whilst operating in the Abr Al Sharq site camp and ECP work areas.

4. References

International Security Standards
RtS Standards
HSE Standards
Abr Al Sharq Security Standing Orders

5. Description of work Security Systems

5.1. GENERAL

This section describes the protective measures and access control at the Abr Al Sharq site office camp.

The Perimeter Protection:

Outer perimeter

Single line chain link fence (2.9m high). Fence to be galvanized chain link design fitted with anti-climb top guard facing outwards at approximately 45 with razor wire or equivalent (to take upto 2.9m height). The fence should be secured at the base and dug in. The fence to be adequately Designed to prevent penetration to the base should anyone attempt to go over, through or under it.

Gates

Requires use of pedestrian gate and vehicle gate and should be the same height and specification as the perimeter fence including razor wire on top. Gates should be able to be locked and secured in place to prevent any forced vehicle access either during a lockdown or during non-working hours.

Signage/Road barriers

Signs to be erected stating no unauthorized access and IDF/SAF procedures

External Vehicle Parking

An area (graded or compacted gypsum) should be prepared exterior to the camp entrance to facilitate parking

Office

Sufficient lockable storage for all paperwork and other equipment to ensure nothing left out during Nighttime hours.

5.1.1 SITE OFFICE PEDESTRIAN ACCESS:

The site office camp is designed to permit controlled access via the main access gate leading to the main Access site offices; this will be controlled by Abr Al Sharq staff and in accordance with the Abr Al Sharq site access list.

5.1.2 VEHICLE PARKING AREA

Vehicle parking will be in the designated area outside of the office perimeter fence.

5.1.3 BADGING SYSTEM

All Abr Al Sharq Staff will be issued with ACS badges on successful approval of MOO Information & SOC applications. Abr Al Sharq administration staff will be responsible for ensuring East staff are authorized to operate within the FIELD. The Project HSSE manager will oversee all badging activity and will report any anomalies to the COMPANY security manager.

5.1.4 ALARM SYSTEM

A fire alarm system will be installed at the site offices to warn of fire, adequate signage and master points will be displayed; further detail is contained within the HSE plan.

5.1.5 COMMUNICATIONS

All communications will be via cell phone, a contact telephone list of all key staff and emergency numbers will be produced prior to works starting. A copy of this list will also be held by all Abr Al Sharq Key staff and will be prominently displayed in the Site Offices.

5.1.6 SIGNAGE

Abr Al Sharq will erect clear signage to direct staff to the site office pedestrian access

5.1.7 MATERIAL CONTROL

Abr Al Sharq will employ a material control system at site to ensure loss prevention, a material control document can be found at appendix 11.3.

5.1.8 SERVICE & MAINTENANCE

Abr Al Sharq will ensure that all security infrastructure at the work site office is maintained in good condition. All damages will be reported and the project site manager will be responsible for ensuring that all faults are rectified expediently.

6 Execution Plan

Abr Al Sharq intend to be operational within FIELD fora period of up to 24 months. Manning levels for the work force will fluctuate over the scheduled period of works.

6.1.2 WORK FORCE TRANSPORTATION

Abr Al Sharq will transport all workers to and from Oil Field in Contractor supplied and Company approved transport. It is intended that all staff living in Basra City will be collected from different bus collection points to prevent large numbers of people gathering. Staff recruited from the local area will be collected from local collection point.

6.1.3 LOSS PREVENTION – SITE OFFICE AREA

Abr Al Sharq will ensure that no attractive items remain in the open office areas, all offices, drawers and cabinets will be locked at the close of business each day and checked to ensure all areas are secure prior to departing the site each day. In addition a chain and security padlock will be used to secure the pedestrian and vehicle access gate each evening. The office area will have perimeter security infrastructure as depicted on Company minimum security standards for site offices.

6.1.4 LOSS PREVENTION - WORK SITE AREAS

In order to assist in the prevention theft of tools & materials from the work site areas, all tools when not in use will be secured in the relevant tool boxes and secured in a Metal shipping container at night which will be further secured by two (2) security padlocks. Site foreman will be responsible for the daily security of tools and materials during the working day. An itinerary of all Contractor tools and materials will be maintained by the logistics manager/ material controller. The Foreman will conduct a clearance of each work front prior to closing down each day and will report to the HSSE manager inform-ing that all tools and attractive materials are secure for the evening. Any thefts will be reported directly to the HSSE manager who in turn will inform the Company EpCM Security Manager.

7 security Responsibilities

7.1.1 HSSE MANAGER

The HSSE Manager is responsible for the following:

- Provide strategic direction on all security related matters to Abr Al Sharq Project Management
- Oversee the development and implementation of the Abr Al Sharq security plan.
- Liaison with local Iraqi Security Forces
- Maintain close liaison with COMPANY Security Manager for all security related issues
- Reporting of security Incidents to COMPANY security management
- Overseeing all daily Abr Al Sharq security matters
- Investigate known or suspected incidents

7.1.2 ABR AL SHARQ EMPLOYEES

All Abr Al Sharq employees are subject to Company and Abr Al Sharq security procedures and must follow the security policies and procedures while working in Oil Field Development (FIELD). Abr Al Sharq HSSE manager will be responsible for ensuring all personnel receive a Oil Field security induction brief prior to the start of works, a register of names must be maintained off all attendees. New comers must also receive a field security brief on arrival

7.1.3 SOCIAL POLICY (RECRUITMENT OF LOCAL STAFF)

Abr Al Sharq understands the requirement to interface with the local community and will recruit non skilled staff in accordance with Company Social Policy. The Company CLO will be engaged along with the LDC for recruitment and dismissal of local staff.

8 SECURITY RESPONSE

8.1.1 SECURITY EMERGENCY

In the event that a security emergency arises during the project whilst working within FIELD, the senior person present will report the emergency to the Abr Al Sharq HSSE manager. The Abr Al Sharq HSSE manager will call the Field Emergency Telephone Number and request assistance as necessary, the Abr Al Sharq HSSE manager will explain the full circumstances of the emergency when requesting assistance. In the absence of the HSSE manager, the senior person can call the Field Emergency Telephone number direct As part of the COMPANY security incident reporting procedure the Abr Al Sharq HSSE manager will report security incident details to COMPANY as follows:

- SPOT REPORT-within 1 hour of incident taking place
- FIRST INCIDENT REPORT-within 24 hours of incident taking place
- FULL INCIDENT REPORT- within 7 days of incident taking place

8.1.2 MEDICAL RESPONSE

Abr Al Sharq security manager will assist where required with medical response incidents, details of medical response can be found within the Abr Al Sharq HSE plan.

9 SECURITY AUDITING

Abr Al Sharq understands that the COMPANY Security Manager will conduct periodic visits as required. COMPANY Security Manager (or nominated staff) will conduct security audits of work camp site visiting every 3 months and on an ad-hoc basis to carry out spot checks and inspections.
